ABOUT ST MAGNUS WAY

The St Magnus Way is a long-distance pilgrimage route starting on Egilsay and continuing through mainland Orkney. It follows the story of St Magnus and gives time and space for reflection on the journey. You are welcome to join us wherever you are in the world and wherever your path has taken you thus far.

THIS REPORT

It begins with a summary of the data, then takes a look at some of the highlights and key statistics. After spotlighting our accomplishments, it moves on to examine each aspect in detail, beginning with Facebook, then discusses our website and app respectively. Finally, it puts forth some recommendations for the coming year based on the evidence gathered.
SUMMARY

Over the past year, we have grown our Facebook page, increased the level of interaction people have with the St Magnus Way, and spread awareness of the route among locals and potential visitors after the pandemic. We have subtly improved our website in many respects by both tinkering and updating ourselves and working with the developers at NB Communication. The app has also undergone major improvements led by the Resources Subgroup, headed by Edward Mason and this is a continuing process that will hopefully be mostly completed later this year. Alongside our core offering, we are gathering material for and conceptualising the Virtual St Magnus Way, which will be a resource for would-be pilgrims who are unable to walk the route in person.

2020 HEADLINES

- Facebook likes increased by 27%
- Website acquisitions were down by 5.64%
- Average app session lasted 2 mins 18 secs
OUR APPROACH

We developedformatted several videos this year for our Facebook page, which generated a lot of views. Alternative media platforms could be worth exploring, for example, Twitter, which is an area of growth for referrals to the website.

Although by most measures 2020 has been a successful year on social media, it is difficult to quantify exactly how this translated into physical engagement with the Way.

Success can be measured in part with reference to contributions to our Crowdfunding Campaign. That we were able to reach the final and be selected as one of the winners demonstrates the power of our social media presence.

Demographics and platforms
Many younger people are turning away from Facebook now and will be found on Twitter or Instagram, the former of which has demonstrably increased in referring people to our website.

iOS vs Android
More people are using iOS now than Android to interact with our app. We will look into improving the reliability and functionality of the app as well as developing resources.

2021 GOALS

Our goals for 2021

SOCIAL MEDIA
Post regularly, encourage website referral, explore platforms, continue video content.

WEBSITE
Increase searchability, integrate new Virtual Way experience, maintain and update.

APP
Continue to work on resources with a view to having revised the whole route by the end of the year. Raise awareness of the app and work being done by posting on the website and social media.
NOTES TO DATA GATHERED

Where the St Magnus Way accessed data used to make up report

1. Facebook

The data was collected through the Insights tab for the calendar year 2020.

2. Website

NB Communication provided website statistics for 2020.

3. App

App statistics were provided by Firebase.
